

Using ratios and proportions, fractions, decimals and how they relate to each other.

<p>2 LAST UNIT Proportional Reasoning</p>	<p>1 CURRENT UNIT: Equivalent expressions and one-variable equations (13 days)</p>	<p>3 NEXT UNIT One-Variable Inequalities 12 Days</p>
---	---	--

<p>8 Unit Schedule</p>	<p>Vocabulary: Coefficient Constant Equation Exponent Expression Order of Operations Prime Factorization Rational Numbers Solution Set Variable</p>
------------------------	--

<p>7 UNIT SELF-TEST QUESTIONS</p>	<ol style="list-style-type: none"> 1. What is the process for evaluating the equivalency of two expressions? 2. What type of plans and/or strategies can be used to solve problems? 3. How can solutions to problems be justified using concrete models, pictorial models, and algebraic representations? 4. How can the mathematical properties (inverse, identity, commutative, associative, distributive) be used to generate equivalent expressions? 	<p>6 UNIT RELATIONSHIPS</p> <p>Generating Determining Distinguishing Writing Modeling Solving</p>
